AI Solutions:

Empowering Educators to Personalize Learning

This session will demonstrate AI's role in differentiating instruction, building background knowledge, and creating personalized learning paths. You'll gain proactive strategies for adapting curriculum while seeing a comparison of a variety of AI tools. Learn how AI can support Universal Design for Learning (UDL) by helping teachers plan lessons that provide multiple means of engagement, representation, and action/expression to meet the needs of all learners. The session will offer practical approaches to make your instruction more responsive, meaningful, and inclusive. Walk away with actionable strategies to build more adaptable, student-centered classrooms!
