

Linda Doehle has recently worked as an Assistive Technology Specialist for the Yakima School District. She graduated from Whitworth College where she majored in computer science and mathematics. She started her career as a software engineer and independent computer consultant. Linda enjoys being able to use her technology skills in helping students optimize their abilities through the use of assistive technology.

Linda started her career as a software engineer but turned to computer consulting after her children were born. As a consultant, she taught students to use educational and business programs. Linda enjoys being able to use her technology skills in helping students optimize their abilities through the use of assistive technology. After becoming certified in Assistive Technology for Education, Linda became the Assistive Technology Specialist for the Yakima School District. Linda has a BS in computer science from Whitworth College.
